Intelligent LED Sign Illumination

[Patent No. US 8,099,261](#)

Low-cost Solid-state Identification Device

[Patent Pending No. US 14,455,928](#)

Apparatus Intelligent Illuminated Sign, Methods of Configuration and Controls

[Patent Pending No. US 14,475,911](#)

Apparatus Real Time Control and Navigation System Using Networked Illuminated Signs Improving Safety and Reducing Response Time of First Responders

The MagicSign™ and MagicStreetSign™ are state-of-the-art patented and patent pending intelligent LED illuminated devices providing the most comprehensive and safe utilization of LED's for illumination of sign, including: street name signs, street address signs, and parking space signs.

The MagicSign™ and MagicStreetSign™ devices are designed to make these signs visible during evening and night hours. As result, these products improve safety of the communities where they are installed, and assist First Responders in reducing the response time while attending to an emergency during evening and night hours. For added security and safety, the MagicSign™ and MagicStreetSign™ devices can be configured for interfacing via MagicSignNet™ wireless network to a host computer, comprising a closed-loop real-time control and visual navigation system. The state-of-the-art technology is intended to serve as a solution to shaving lifesaving seconds and possibly even minutes off the response time for First Responders trying to identify the location of a crisis during evening or night hours.

MagicSign™ and MagicStreetSign™ - are World's first intelligent configurable color illuminated street address signs visible from 100's of feet away consuming below 1 Watt of electricity.

OPTIONAL FEATURES

- Automatic adjustments of the illumination power based on: ambient light, internal temperature, and remaining battery power - sustaining the sign efficiency and longevity.
- Local and remote controls for indicating "status" (residential complex, property, etc.), supported by networked configuration in events of emergency - reducing Response Time of First Responders attending to emergency.
